

USAMA RIASAT

Senior Software Engineer

osamariasat@gmail.com ♦ [linkedin.com/in/usamariasat](https://www.linkedin.com/in/usamariasat) ♦ (+92) 324 4025882

OBJECTIVE

Senior Software Engineer with 6+ years of experience building scalable web applications and AI-native systems using Python (Django, FastAPI) and React. Specialized in designing microservice architectures and developing agentic AI systems, including HIPAA-compliant RAG pipelines, conversational agents, and multi-model LLM workflows. Proficient in leveraging AI-assisted development tools (Cursor, Claude Code) and modern orchestration frameworks to accelerate development and improve system reliability. Proven track record of leading cross-functional teams and delivering high-impact, production-grade AI solutions in regulated healthcare environments.

TECHNICAL SKILLS

Backend:	FastAPI, Django, Flask, Node.js, Express.js, GraphQL, Langchain, Langgraph, LLMs, GenAI
Frontend:	React.js, Next.js, Vue.js, Redux, Tailwind CSS, Material-UI, Bootstrap, HTML5, CSS3
Databases:	MySQL, PostgreSQL, MongoDB, Redis, AWS RDS, MilvusDB, ChromaDB
DevOps:	AWS, CI/CD Pipelines, GitHub Actions, Docker, Kubernetes, Terraform, AWS CloudFormation
Tools/IDE:	Claude Code, Cursor, MCP, Git, GitHub, VS Code, Visual Studio, Postman, Jira, Asana, ClickUp, Trello

EXPERIENCE

Senior Software Engineer IGNIS Health (Remote)	Oct 2024 - Present Charlottesville, VA
- Architected and deployed HIPAA-compliant, AI-powered healthcare solutions on AWS, ensuring PHI data security, audit logging, and role-based access controls across all system layers - Designed and implemented advanced RAG pipelines with MilvusDB and ChromaDB for clinical knowledge retrieval, improving LLM response accuracy by 35% and enabling evidence-based AI recommendations - Built multi-agent LangChain/LangGraph workflows for clinical chatbot assistants, patient intake automation, and domain-specific AI applications with real-time streaming and memory management - Leveraged AI-assisted development tools (Cursor, Claude Code) and MCP-based tooling to accelerate feature delivery cycles by 40%, maintaining high code quality and test coverage - Designed scalable backend microservices using FastAPI and Django with JWT/OAuth2 authentication, reducing API latency by 30% and supporting 10K+ concurrent healthcare users - Boosted system performance by 25% through Redis caching, PostgreSQL query optimization, and async task processing with Celery - Improved deployment reliability and uptime to 99.9% using Docker containerization, Kubernetes orchestration, and automated CI/CD pipelines on AWS EKS - Collaborated closely with clinical stakeholders to translate complex healthcare workflows into scalable, compliant software solutions - Provisioned and managed cloud infrastructure using Terraform and AWS CloudFormation, enabling reproducible environments, automated scaling, and reduced manual deployment errors	
Senior Software Engineer OCloud Solutions	Sep 2023 - Oct 2024 Lahore, Pakistan
- Developed microservices using Django REST Framework, increasing system scalability by 30% and reducing database query time by 25% through ORM optimization - Achieved 100% unit test coverage, reducing production bugs by 50% and improving release confidence - Improved deployment speed and uptime by 40% using Docker, Kubernetes, and AWS infrastructure automation	

Senior Software Engineer

Xprolabs

July 2022 - Sep 2023

Lahore, Pakistan

- Directed development of 3+ scalable web applications using Django and Flask, reducing response times by 20%
- Integrated Redis caching and GA4 analytics, improving data processing efficiency and user behavior insights

Software Engineer

Square63

Aug 2020 - July 2022

Lahore, Pakistan

- Delivered full-stack solutions using Django, React, and PostgreSQL; contributed to end-to-end SDLC, improving delivery timelines by 15%
- Collaborated with cross-functional teams (5+ members) to ensure high-quality, on-time releases

PROJECTS

DeftGPT. *Python, FastAPI, React, Langchain, AWS, LLMs, MilvusDB, Docker* [↗](#)

- Built a multi-model AI platform supporting 4+ LLMs, enabling scalable conversational AI
- Implemented scalable RAG pipelines, improving response relevance and accuracy
- Supported multimodal interactions (text, image, audio, video) in real time

ZangerSecurity. *Python, FastAPI, RabbitMQ, LLava, Ollama, Transformers, AWS*

- Developed a distributed AI system processing 1000+ images/day with low-latency inference
- Built an async pipeline using RabbitMQ, improving processing throughput
- Enabled real-time event detection using vision-language models

NookMart. *Python, Django, React, Redis, AWS* [↗](#)

- Nookmart is a shopping platform where people can buy Animal Crossing Bells, Furniture, Clothing, and NMTs using credit cards.
- Enabled a fast 24/7 automated delivery system for digital products

Retail Capital. *Python, Django, DRF, Flask, Celery, AWS, TruID, GA4* [↗](#)

- A cutting-edge software platform planned to streamline and automate the funding process for businesses and startups, facilitating easy access to investment opportunities and financial resources.

GoPainting. *Django, React, AWS EC2* [↗](#)

- Enables users to apply multiple colors to images in real time for visualization
- Helps users make informed painting decisions through interactive previews

EDUCATION

Bachelor of Computer Science, PUCIT/FCIT

Sep 2016 - May 2020

Lahore, Pakistan

CERTIFICATES

Meta Front-End Developer

Coursera

Project: Building Ambient Agents with LangGraph [↗](#)

Langchain Academy
